Posture, Neck Pain, Back Pain, Headaches, Migraines, Dizziness?

GRAVITY™ uses your own bodyweight to gently and naturally release tension and stiffness to realign your neck, spine and pelvis back to perfect Posture. Having an improved Posture relieves pain and associated tension throughout the whole body.

POSTURE

Using computers, mobile phones and sitting for extended periods causes poor posture. GRAVITY™ realigns your posture gently and naturally to relieve pain and associated tension through the whole body.

NECK

Our head weighs on average over 12 lbs or 5 kg, so the muscles in the neck are constantly working very hard. GRAVITY™ helps to create a gentle yet extended hold between the neck and the head and draws the muscles in to a better alignment.

BACK

Nearly all back pain is not coming from the spine itself, but from the muscles that support it. GRAVITY™ can take the pressure off these back muscles and helps retrain the spinal structures into a perfect position, reducing pain and returning the spine to its optimum position.

20 minutes everyday can unlock
your body's potential
